How Players Are Scored

Leyton Orient FC | 29 September 2026 | **40** metrics | **8** positions | **3,345** players rated, 2025/26 | **7** leagues

CONTENTS

1. How a rating is calculated
2. How the weights were set
3. Metrics by position — one page each
4. Data coverage by league
5. Finding 1 — Physical decides most of the ranking
6. Finding 2 — 581 players are rated differently
7. Finding 3 — 13 metrics are not counted as requested
8. Decisions

01 HOW A RATING IS CALCULATED

Every player is compared only to players in the **same position, the same league and the same season**, who have played at least **450 minutes**. A rating of 3.0 is the league average for that position. Because of this, ratings cannot be compared between leagues.

```
step 1 each metric → percentile among those peers (0–100)
step 2 percentile → band = 3 + (percentile − 50) ÷ 20, limited to 1–5
step 3 dimension = average of its bands — every metric counts equally
step 4 rating = Performance × 0.571 + Physical × 0.429
```

PERCENTILE	10TH	30TH	50TH	70TH	90TH	100TH
Band	1.00	2.00	**3.00**	**4.00**	5.00	5.00

Both anchor points are the club's own thresholds — league median is the Minimum Standard and scores 3.00; the 70th percentile is Elite and scores 4.00. Bands stop at 5, so anything above the 90th percentile scores the same.

Worked example — Isaac Ogundere, Centre Back, League One 2025/26

Compared against 116 League One centre backs who passed 450 minutes.

PERFORMANCE — 13 METRICS	PCTL	BAND
Pressures	100	**5.00**
Counterpressures	98	**5.00**
Blocks	88	**4.90**
Pass value	67	**3.86**
Deep progressions	66	**3.78**
Ground duel win %	65	**3.73**
Pass completion %	41	**2.57**
Opponents bypassed (packing)	40	**2.48**
Defensive value	38	**2.40**

PHYSICAL — 8 METRICS	PCTL	BAND
Total distance	100	**5.00**
High-speed runs	100	**5.00**
High-speed run distance	100	**5.00**
Sprints	99	**5.00**
Sprint distance	99	**5.00**
Metres per minute	96	**5.00**
Top-5 peak speeds	94	**5.00**
Peak sprint speed	84	**4.72**
Average		**4.97**

Ball wins	29	**1.97**
Turnovers	28	**1.92**
Aerial win %	3	**1.00**
Touches in box	2	**1.00**
Average		**3.05**

```
rating = 3.05 × 0.571 + 4.97 × 0.429 =
3.87
```

> **Ogundere is 58th of 116 on Performance, and 4th of 116 overall.** His performance percentiles range from 2 to 100 and average out near the league median. His physical percentiles are all between 84 and 100.

02 HOW THE WEIGHTS WERE SET

The club's framework document sets six weights. The ranking uses the two that are measured from data. Psychological and Medical Risk are entered by a scout and are held out of the ranking, so their share is redistributed across the two that remain.

DIMENSION	SOURCE	CLUB DOCUMENT	USED IN THE RANKING
Performance	Impect	40	**57.1%**
Physical	SkillCorner	30	**42.9%**
Psychological	Scout	10	not used
Medical Risk	Scout	15	not used
Total		**95**	**100%**

```
Performance 40 ÷ (40 + 30) = 0.571
Physical 30 ÷ (40 + 30) = 0.429
```

Goalkeepers are rated on Performance at 100%, with no Physical component.

Summary by position

POSITION	PERFORMANCE METRICS	PHYSICAL METRICS	PERFORMANCE WEIGHT	PHYSICAL WEIGHT	PLAYERS RATED	AVERAGE RATING
Goalkeeper	6	—	100%	0%	263	3.05
Centre Back	13	8	57%	43%	667	3.02
Full Back	22	8	57%	43%	630	3.02
Defensive Mid	16	8	57%	43%	565	3.02
Central Mid	20	8	57%	43%	102	3.12
Attacking Mid	21	8	57%	43%	236	3.06
Winger	21	8	57%	43%	415	3.03
Centre Forward	24	8	57%	43%	467	3.03

04 DATA COVERAGE BY LEAGUE

Impect covers every player in all seven leagues, so Performance is always available. SkillCorner does not.

LEAGUE	PLAYERS RATED	WITH PHYSICAL DATA	WITHOUT	AVERAGE RATING
Championship	577	90%	56	3.03
League One	573	90%	58	3.03
League Two	567	92%	47	3.03
National League	581	89%	62	3.02
Scottish Premiership	275	92%	22	3.05
Scottish Championship	201	**0%**	201	3.07
Premier League 2	571	**76%**	135	3.02

Where physical data is absent, the rating is Performance at 100% rather than 57%. This affects **581 of 3,345 players** — see Finding 2.

Physical decides 69% of the ranking, not 43%

Physical carries 43% of the weight. It accounts for **69% of the difference** between where players finish in the ranking.

Measured across the 2,764 players who have both dimensions.

CAUSE

A dimension can only separate players if its scores spread out. If everyone scores close to 3, it decides nothing, whatever weight it carries.

Performance averages 13 to 24 metrics that measure **different things**. A player strong in one is often weak in another, so the average lands near the middle — Ogundere's 13 percentiles ran from 2 to 100 and averaged 3.05.

Physical averages 8 metrics that largely measure **the same thing**. A player who runs a lot scores highly on all eight, so nothing averages out — Ogundere scored 84 to 100 on every one, averaging 4.97.

	PERFORMANCE	PHYSICAL
Metrics averaged (Centre Back)	13	8
Spread of scores across players	0.50	**1.00**
How closely its own metrics move together	0.06 — barely	**0.51 — closely**
How closely it tracks the final rating	0.67	**0.87**

The eight physical metrics are four things, measured twice each

THESE TWO METRICS	MEASURE	HOW CLOSELY THEY MOVE TOGETHER
High-speed runs & High-speed run distance	High-speed running	**0.96**
Sprints & Sprint distance	Sprinting	**0.94**
High-speed runs & Sprints	Running above a speed threshold	**0.92**
Total distance & Metres per minute	Distance covered — the same measure in two units	**identical**

The same effect appears within Performance: the fewer metrics a position has, the more its Performance score spreads. Goalkeepers, rated on 6 metrics, have the widest Performance spread of any position at 0.83, against a centre back's 0.42 on 13 metrics.

> Lowering the Physical weight from 43% to 30% would reduce its influence from 69% to roughly 55%, because the duplication would remain. Removing the four duplicated metrics addresses the cause.

581 players are rated on Performance alone

Where SkillCorner does not cover a competition, there is no Physical score, so those players are rated on Performance at 100% instead of 57%. That is **581 of 3,345 players — 17%**, including every Scottish Championship player and a quarter of Premier League 2.

RATED ON	PLAYERS	AVERAGE	SPREAD	LOWEST	HIGHEST
Performance + Physical	2,764	3.03	0.57	1.49	4.44
Performance only	581	3.03	**0.66**	1.12	4.91

EFFECT

The two groups average the same, so neither is systematically favoured.

But scores spread more widely without a Physical component, so both very high and very low ratings are easier to reach. The highest-rated player in the platform, at 4.91, has no physical data.

13 requested metrics are not counted as requested

One metric is unavailable

REQUESTED	POSITION	REASON	EFFECT
Long-ball accuracy %	Goalkeeper	Not supplied by Impect	Goalkeepers rated on 6 metrics, not the 8 requested

Twelve entries are counted once instead of twice

In each pair below, the framework lists two metrics, but Impect supplies a single measurement covering both. The concept therefore carries half the weight the framework implies.

REQUESTED	ALSO REQUESTED	BOTH COUNTED AS	POSITIONS AFFECTED
Pressures in opposing half	Counterpressures	Counterpressures	Centre Back · Full Back · Attacking Mid · Winger · Centre Forward
xG buildup	Pass value	Pass value	Centre Back · Defensive Mid · Central Mid · Attacking Mid · Winger · Centre Forward
Dribble success %	Dribble & carry value	Dribble & carry value	Full Back · Central Mid · Attacking Mid · Winger
Possession-adjusted tackles & interceptions	Ground duel win %	Ground duel win %	Centre Back · Full Back
Save %	Shot-stopping %	Shot-stopping %	Goalkeeper

DECISION 1

Is 57% Performance / 43% Physical the intended split?

Derived from the framework's 40 and 30 after removing the two scout dimensions.

DECISION 2 — THE LARGEST EFFECT

Should Physical continue to decide 69% of the ranking?

Cause: its eight metrics measure four things twice each, so they do not average out the way Performance's do.

Options: remove the four duplicated metrics — addresses the cause; lower the Physical weight — reduces influence to roughly 55% only; or both.

DECISION 3

How should the 581 players without physical data be rated?

Cause: SkillCorner does not cover Scottish Championship, and covers 76% of Premier League 2.

Options: rate on Performance alone as now; mark them on screen; or leave them out of lists that mix leagues.

DECISION 4

Are the five merged pairs acceptable as single measurements?

If a concept should carry the weight of two entries, it needs either a second distinct metric or an explicit weight.

DECISION 5

Should goalkeepers be rated on 6 metrics with no physical component?

Cause: long-ball accuracy is unavailable, and the framework excludes Physical for goalkeepers. Their Performance spread is 0.83, the widest of any position.

Leyton Orient FC · 29 September 2026 · Figures from the 2025/26 season, 3,345 rated players across 7 leagues. Every figure is reproducible from the platform database.
